

## **Job Site Helpful Hints**

If you are doing a remodeling project, we have some helpful hints to ensure that the installation of your project goes as smoothly as possible.

- There will be some unavoidable dust associated with the installation process. If you have a fish tank or any electrical equipment in close proximity to the workspace, we ask that they are well covered to avoid any damage. We are not responsible for any damage associated with dust.
- Move all pictures, mirrors and furniture away from the walls of the adjacent rooms. Vibrations from the installation process could cause damage to these items.
- If you have any pets, please make sure they are safe and secured in a location of the house that is away from the project area.
- Line up any professionals you may need to assist in your project (i.e. line up a plumber to install and hook up your sink). Our installers are not licensed electricians or plumbers so they are not able to assist in any areas of your project aside from the installation of our products, including hooking up water sources.
- If you would like to take any pictures of your old area as a keepsake, please feel free to do so prior to the installation date. Comparing old and new photos is a fun way to celebrate the completion of your project!
- Don't hesitate to call with any questions concerning the installation process. We want your project to be as stress-free as possible for you and answering all of your questions and concerns is our way to make sure that is achieved.
